

What do you know about
Folsom Lake College?

The Harris Center

Great Athletic Facilities

But did you know
We have a Potable Water and
Wastewater Treatment
Program?

Introductions

- Vicky Maryatt, Dean, Career Education
- Ed Marlow, PE Adjunct Professor
- Michelle Derryberry, 3rd Semester Student
- Sean Nguyen, 1st Semester Student

Our Program - Courses

- Math for Water and Wastewater Operators
- Science for Water and Wastewater Operators
- Water and Wastewater Management: Basic Instrumentation and Electrical Controls
- Introduction to Water, Wastewater and Recycled Water Management

Our Program - Courses

- Water and Wastewater Treatment Plant Operations I
- Water and Wastewater Treatment Plant Operations II
- Water Distribution and Wastewater Collection Systems
- Independent Studies
- Work Experience in Environmental Technology

Professors

- Heather Ramill, Adjunct Professor
- Ed Marlow, Adjunct Professor
- Fernando Escalante, Adjunct Professor
- Mike Crow, Adjunct Professor
- Chio Murray, Adjunct Professor

How are we handling COVID?

- Scheduled classes are going
- Remote learning
- Classes are at night
- The lab for the Science for Water and Wastewater Operators is running remote

What Have We Learned?

- We have not lost students, actually we have gained students
- Remote learning works for our program
- Because we are the only college in the area offering these classes, we are drawing students from all over

Butte County

Sacramento County

Redding

El Dorado County (incl. So. Tahoe)

Tracy

Amador County

Adak, Alaska (Aleutian Chain)

This Fall we have offered three classes and we have an average of 20 students enrolled in each class

Our Goal is to prepare our students for a position in the water or wastewater treatment field.

We have a program with SETA to help our students find jobs, SO

If you are looking to hire someone, why not choose one of our students?

Contact Mohsen Gharemani, our SETA representative. He is working with our students.

We believe we have been the
best kept secret in the local
water and wastewater fields.
