

Legislative Tracker

Last Updated: September 09, 2022

Overview

The following legislative tracker provides the status of legislation introduced in the 117th Congress of interest to the RWA. Each of the bill numbers is hyperlinked to the bill text, FiscalNote (FN) Outlook information and other related details.

The FN Outlook on the right side of each bill provides the legislation's pre-Floor (left) and Floor (right) likelihood of passing. The percentages shown are the status of the bill in the Chamber where it is currently under consideration (this is shown under 'Status'). The pre-Floor score is defined as the bill's likelihood of passing after it has been introduced but while it is being considered in that chamber's committees - before it has moved to the Floor for a vote.

This bill establishes a funding source for certain water resources development projects in western states. The bill also reauthorizes and expands existing water resources development programs, as well as establishes new programs. Specifically, the bill establishes the Bureau of Reclamation Infrastructure Fund to fund water-related programs, including water reclamation and reuse projects, dam safety projects, and the WaterSMART program (which provides assistance to eligible government entities to increase water supply). The bill also reauthorizes through FY2028 the Fisheries Restoration and Irrigation Mitigation program (which funds fish passage projects in certain areas that drain into the Pacific Ocean). The bill also establishes new programs directed at western states to provide assistance to agricultural producers to create and maintain waterbird and shorebird habitats, award grants to eligible government entities and nonprofit conservation organizations for habitat restoration projects that improve watershed health, and prepare plans to sustain the survival of critically important fisheries during periods of drought.

Bill Summary: Last edited by TFG Reports at Feb 23, 2022, 10:10 PM
This bill would require the Secretary of the Interior to work in coordination with the Secretary of Agriculture and the Administrator of the EPA to establish two to five watershed restoration pilot programs across the country. Each pilot program must incorporate predictive data analysis to analyze millions of acres of a watershed to precisely locate the most effective acres for restoration that will make the largest impact. Outcomes of these pilots can include a quantifiable reduction in nutrient or sediment runoff or thermal load, quantifiable increases in dissolved oxygen and surface water or groundwater that functionally benefits fish and wildlife species, and any other quantifiable benefits identified to support watershed restoration.

This bill would make several changes to the Stafford Act that governs FEMA to ensure that FEMA's disaster preparedness and response efforts fully address the unique nature of wildfires and their impacts on communities. This includes directing FEMA to pre-deploy assets during times of highest risk, red flag warnings, improving relocation assistance for public infrastructure affected by fires, ensuring equity of assistance for tribal communities and tribal governments, and examining ways to speed up the FEMA assistance process.
