

Question	Attendee
The RWA members are names, as are the Agencies, please tell us who the WB External Partners are?	Anonymous Attendee
Can we see who is participating and what the questions are as we progress?	Barbara Evoy
Can we see all the attendees even if they don't ask questions. How many participants are attending?	Suzanne Pecci
Is water treated before ASR? Is PFAS removed?	Anonymous Attendee
public comments tonight or when the project is formally proposed?	Barbara Evoy
Who determines if the water bank is in compliance with a GSP?	Anonymous Attendee
Will these slides be available/published on the website this week?	Leticia Morris
Will all the funding sources of the water bank both public and private be made available to the public, including the amount of the investment?	Suzanne Pecci
Are you saying Santa Clara Water as an external agency will have access to the Water Bank?	Gwynne Pratt
Surface water has higher dissolved organic carbon concentrations than groundwater, and injecting treated surface water may introduce disinfection byproducts to the aquifer, and it has been demonstrated that they can accumulate over repeated cycles of injection and retrieval. Do you know the concentrations of DBPs are in the groundwater retrieved in the Roseville operation?	Neil Dubrovsky
What are the benefits of being a federally recognized water bank?	Anonymous Attendee
Additionally will shares of the Water Bank be sold and traded in the US and International markets?	Suzanne Pecci
The program seems to be focused on water purveyors. How does the program include/advance SAFCA's concept of storm water capture or encourage other groundwater users to participate?	Ted Rauh
How are the RWA's expenses covered? Will the formation of this water bank mean additional fees to customers in the RWA area?	Anonymous Attendee

<p>Surface water moves much faster than groundwater recharge. Have you calculated how the difference between flow rates impacts that actual amount of water that recharges the aquifer during the "in Lieu" period as compared to the amount of surface water used during the period that is credited as groundwater recharge? If those calculations have been made, can you please share them?</p>	<p>Anonymous Attendee</p>
<p>So RWA and water bank dues/fees are sort of being buried into our local rate increases..... isn't this large enough of a proposal that it should be voted on by the entire area??</p>	<p>Anonymous Attendee</p>
<p>The banking concept includes strong, verifiable accountability. How do the principals assure a system that is accountable and that it will be transparent.</p>	<p>Ted Rauh</p>
